

MOHANAD ABDULSATTAR HARBI

IT Manager | Network Infrastructure Specialist | Hospitality IT Expert

mohandharbe59@gmail.com • +964 7508969908 • +964 7782931412 • Erbil, Iraq • [linkedin.com/in/mohanad-harbi](https://www.linkedin.com/in/mohanad-harbi)

PROFESSIONAL SUMMARY

Results-driven IT Manager and Network Infrastructure Specialist with extensive experience delivering end-to-end IT operations within the hospitality sector. Proven track record managing enterprise-grade network environments (Cisco, Huawei, MikroTik, UniFi), Property Management Systems (PMS), Point-of-Sale (POS) platforms, financial systems, and cybersecurity frameworks. Hands-on expertise in VMware ESXi hypervisor management, multi-VM deployment and administration, physical server installation, and Ubiquiti UniFi Dream Machine (UDM) configuration. Adept at VLAN architecture, firewall administration, server management, and business continuity planning. Skilled at leading solo IT operations while providing cross-departmental support for Finance, HR, F&B, and Front Office. Committed to achieving zero downtime, maximizing system availability, and aligning technology strategy with business objectives.

CORE COMPETENCIES

IT Management • IT Operations • Network Infrastructure • Enterprise Networking • VLAN Design & Segmentation • Firewall Administration • Cybersecurity & Network Defense • Server Administration • VMware ESXi & Virtualization • Virtual Machine Deployment & Management • Server Installation & Configuration • UDM (UniFi Dream Machine) Setup • Windows Server • Backup & Disaster Recovery • Business Continuity Planning • Hospitality Technology (PMS / POS) • System Availability Management • IT Governance & Compliance • Risk Management • Vulnerability Assessment • Technical Troubleshooting • Cross-Department IT Support • Multi-Vendor Network Environment • Remote IT Support • SLA Management • IT Service Delivery

PROFESSIONAL EXPERIENCE

IT Infrastructure Manager | [Darin Plaza Hotel — Erbil, Iraq](#) 2026 • Lead all IT operations as sole IT responsible for a full-service hotel, managing network infrastructure across Cisco, Huawei, MikroTik, and UniFi platforms.

- Deploy and administer VMware ESXi hypervisor environment, managing multiple virtual machines (VMs) for critical hotel services including domain controllers, application servers, and backup hosts. • Perform physical server installation and rack configuration, ensuring proper hardware setup, BIOS/UEFI tuning, and RAID configuration for optimal performance and redundancy.
- Configure and manage Ubiquiti UniFi Dream Machine (UDM) as the primary network gateway, handling firewall rules, IDS/IPS, VPN, and traffic management.
- Design and maintain VLAN segmentation, ACL policies, and firewall rules to ensure secure separation of guest, staff, and management networks.
- Administer Omega PMS, POS systems, financial platforms, and inventory management systems with a zero-downtime target.
- Implement and manage backup and disaster recovery solutions to ensure business continuity across all critical hotel systems.
- Provide on-site and remote IT support to Finance, HR, Food & Beverage, and Front Office departments, acting as first and sole point of escalation.
- Harden server infrastructure, apply security patches, and monitor system performance to maintain high availability and compliance.
- Develop IT governance policies, conduct risk assessments, and implement cybersecurity controls aligned with industry best practices.

- Configure and optimize wireless LAN infrastructure, ensuring reliable and secure connectivity across all hotel areas.

IT Officer | [Radisson Hotel — Korek Mountain, Erbil](#) 2025 • Administered Property Management System (PMS) and Point-of-Sale (POS) systems, ensuring seamless hotel operations.

- Managed Materials Control (MC), SunSystems financial platform, and payroll systems, supporting Finance and HR departments.
- Operated and maintained enterprise Tape Library backup solutions, ensuring data protection and regulatory compliance.
- Managed firewall configurations, network security policies, switch and router administration, and access point setup.
- Deployed and managed VLAN architecture to segment hotel network traffic and protect sensitive guest and operational data.
- Monitored system availability and responded to incidents, maintaining SLA commitments and minimizing service disruptions.
- Ensured IT compliance and delivered consistent IT service delivery aligned with Radisson global standards.

Network Technician (Freelance) | [Independent Clients — Erbil, Iraq](#) 2022 – 2024 • Designed and implemented LAN/WAN network solutions for small and medium-sized offices, including structured cabling.

- Configured routers, managed switches, and deployed wireless access points with proper IP addressing and subnetting.
- Set up basic firewall configurations and VPN connectivity to meet client security requirements.
- Performed network troubleshooting, fault diagnosis, and preventive maintenance for ongoing client support.
- Designed small office network topologies from requirements gathering through full implementation.

Residential Electrician | [Independent](#) 2019 – 2022 • Performed electrical installations, preventive maintenance, and safety compliance inspections. • Integrated smart home automation systems and provided IoT device configuration and technical support.

TECHNICAL SKILLS

Networking: Cisco Routing & Switching, Huawei Enterprise Networking, MikroTik RouterOS, UniFi Controller & APs, UDM (UniFi Dream Machine), VLANs, ACLs, VPN Configuration, TCP/IP, Subnetting, LAN/WAN Architecture, Wireless LAN Optimization, Network Monitoring

Virtualization & Infrastructure: VMware ESXi Hypervisor, Virtual Machine Deployment & Management, Multi VM Administration, Snapshot & Clone Management, Physical Server Installation & Racking, RAID Configuration, Windows Server Administration, Windows OS, Linux (Basic Administration), Active Directory (Basics), Backup & Recovery Solutions, Cloud Computing (IaaS, PaaS, SaaS), System Hardening, Infrastructure Monitoring

Hospitality IT Systems: Omega PMS (Property Management System), POS Systems, SunSystems Financial Platform, Materials Control (MC), Payroll Systems, Tape Library Backup, Hotel IT Operations **Cybersecurity:** Network Defense, Firewall Administration, Vulnerability Assessment, Security Monitoring, Access Control Policies, Risk Mitigation, Kali Linux Tools, Penetration Testing Concepts

Programming & Tools: Python (Basic), SQL, Bash Scripting, Java, C#, HTML, JavaScript, PHP, Automation (N8N), Microsoft Office 365

CERTIFICATIONS

- Network Defense
- Practical Cisco Networking Labs
- Computer Networks Fundamentals
- Mastering Network Security

- Kali Linux for Ethical Hackers
- Mastering Linux Command

EDUCATION

Bachelor of Science in Information Technology | [Catholic University in Erbil — Erbil, Iraq](#) 2021 – 2025

Relevant Coursework: Network Infrastructure, Cybersecurity, Database Management, System Administration, Software Development

KEY PROJECTS

- **Image Encryption Technique Using Chaotic Map and DNA Sequence Operation** — Planned and deployed a advanced cryptographic methods for securing image data.
- **Smart Home Automation using Cisco Packet Tracer** — Designed and simulated a fully connected smart home IoT network with automated controls.
- **Secure File Manager System Using Batch Script** — Developed a secure file management utility with access control and logging via Windows Batch scripting.
- **Design and Implementation of Campus Network** — Final Year Research Project on scalable multi-VLAN campus network with redundancy and segmentation.
- **Design and Implementation Hotel Management Networking** — Architected and deployed an enterprise-grade network infrastructure incorporating secure VLAN segmentation, robust firewall policies, and seamless integration for PMS and POS hospitality systems.
